

Course Basic Safety VCA (B-VCA) English

Are you looking for a Basic Safety VCA (B-VCA) course that is both practical and to the point? Ingenium's Basic Safety VCA (B-VCA) is exactly what you need!

Our motto: "Safety is something you do."

VCA is internationally known as SCC — Safety, Health and Environment (SHE) Checklist Contractors.

The B-VCA certificate (B-SCC) is designed for operational employees who must work safely and responsibly. You'll learn to recognize risks, apply controls, and work together according to established safety procedures.

Across many industries, the B-VCA/B-SCC diploma is the de-facto standard and is often required to access SCC-certified worksites. Organizations pursuing company SCC certification must demonstrate that all operational employees (with more than two months' service) hold a valid B-VCA/B-SCC certificate.

This course is suitable both as an initial qualification and as a refresher.

How the Ingenium B-VCA course works

1. You receive the digital *Basic Safety* course book by email (printable or readable on tablet/laptop).
2. Work through the chapters and complete the interim quizzes.
3. Questions? We're available by phone and email throughout your study.
4. On the course day, our instructor covers the key topics and you take practice exams.
5. Immediately after the course day, you sit the official B-VCA exam.
6. Within five working days, you receive your result, digital certificate, and digital ID-card by email.

Enrol now for Basic Safety VCA with Ingenium!

What you'll gain

Course objectives

- Understand how to work safely and healthily
- Help prevent incidents and absenteeism
- Achieve the official B-VCA diploma

Outcomes — for employees

- Work safely using clear rules and procedures
- Knowledge of hazards, PPE and permit-to-work systems
- More confidence on the job and a lower risk of incidents
- Official B-VCA diploma with 10-year validity

Outcomes — for employers/clients

- Demonstrable compliance with company and client safety requirements
- Fewer incidents and less sickness absence; higher workforce availability
- Meet client demands and VCA certification expectations
- A consistent "safety language" across projects and sites

Prior qualifications

No prior qualifications are required to attend the Basic Safety VCA course.

Course duration

The course duration is one day.

Occupational Health & Safety

By completing the course, both employer and employee meet the Dutch Working Conditions Act (Arbowet) requirements for adequate instruction and demonstrable competence.

Theory
