

Online course Inspection of fall protection equipment

Are you looking for an online course in fall protection equipment inspections that is both recognised and practical?

The e-learning 'fall protection equipment' training from Ingenium is exactly what you need! Our trained inspectors take a hands-on approach: approving equipment where possible and rejecting it when necessary. At Ingenium, inspections are not an end in themselves but a way to ensure and maintain the safety of fall protection equipment. Our motto is: *Safety is an active process!*

Follow the Inspection of fall protection equipment E-learning course at Ingenium – dé Opleider.

How the Ingenium online course works

- ✓ You register for the e-learning course.
- ✓ You work through the material at home or in your workplace, entirely at your own pace.
- ✓ If you have any questions, please contact us by chat, email, or phone.
- ✓ Once you've completed the course material, you take the final test. After passing, you receive an E-learning Certificate: *Inspection of fall protection equipment*.

With our e-learning course, you will quickly get up to date on the latest legislation and standards.

What are the benefits?

On completing this online inspector training, you will be able to inspect fall protection equipment. Since 1998, it has been a legal requirement in the Dutch HSE law to inspect this equipment, either in-house or through outsourcing. The annual inspection requirement for work equipment is also included in the VCA checklist.

Is any prior training required?

You do not need any technical background.

Course duration and study load

It takes approximately 4 to 6 hours to work through the course material.

Compliance with Occupational Health and Safety requirements

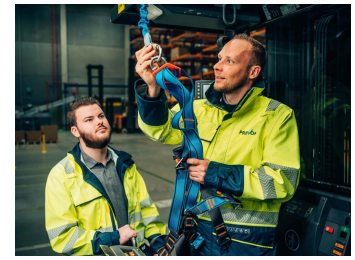

By following this online inspection training, both the employer and the inspector meet the Working Conditions Act's requirement (Arbowet) for sufficient instruction and demonstrable expertise.

Theory and practice

Ingenium's training courses are known for their practical focus, but a solid theoretical foundation is essential for inspection work.

Theory in the online training

- Inspection theory for fall protection equipment
- Definition and key principles of fall protection equipment inspections
- Legal framework for conducting inspections
- The relationship between NEN-EN 365, NEN-EN365, e.g. and the Working Conditions Act
- The inspector's tasks, responsibilities, and authority (TRA)
- Risks associated with using fall protection equipment
- Types of materials, characteristics, and structural principles of fall protection equipment
- Visual inspection procedures
- Practical explanation of approval and rejection criteria
- Setting up and maintaining inspection records

Practical part of the inspector training

Using photos, you will learn how to carry out inspections on fall protection equipment in a practical manner.

Course costs
