What you will gain

After completing the NEN 9140 Instructed Person online course (ev-VOP NEN 9140), you will understand the risks of working on and near electric and hybrid vehicles. You will also be able to take the measures needed to carry out the work safely. Your employer may appoint you as a Instructed Person under NEN 9140.

No prior qualification required

No prior electrical engineering qualification is required, although some basic electrical knowledge is desirable.

Course duration and study time

The course material takes approximately 4 to 6 hours to complete.

Meets Dutch Working Conditions Act requirements

By taking the NEN 9140 Instructed Person course (ev-VOP NEN 9140), both the employer and employee meet the requirements of the Dutch Working Conditions Act (Arbowet) for adequate instruction and demonstrable competence.

Theory and practice

Ingenium dé Opleider courses excel in practical application. Theory is essential for working safely on or near electric and hybrid vehicles. You will learn to assess hazards and risks during simple electrical work and to carry out simple electrical operations safely. Topics covered include:

- Introduction to electric vehicles
- Electric vehicle construction
- Legislation and regulations
- Electrical hazards and accidents
- Personnel qualifications
- Content of NEN 9140: Safe working on electric vehicles
- Principles of working on electric vehicles
- Electrical operations and work procedures
- Working with the power isolated
- Working on live systems
- Tools and personal protective equipment (PPE)
- Safety and measuring equipment
- Workplace emergency response to electric vehicle incidents
